Technical problem solver for automation, security, AI-assisted development and production-grade internal tools.

cv.muri.io

PROFILE

I work best where technical systems, processes and real responsibility meet: analysis, automation, security, documentation and production delivery. I am open to opportunities around technical topics such as automation, internal tools, data collection and analysis, AI-assisted workflows, security, technical concept development and pragmatic implementation.

CORE CAPABILITIES

Automation & Scripting

Custom tools, interfaces, internal workflows and scriptable process improvements.

AI-assisted Development

Independently developed Azure AI pilot, AI-assisted product development and practical AI workflows.

Interfaces & Integration

O365/OAuth2, data migration, system integration, interfaces and SAP-adjacent enterprise context.

Security & Incident Analysis

IAM, least privilege, incident analysis, ITAR context and root-cause work for critical cases.

Systems & Technical Operations

Linux RHEL, Windows, monitoring, critical support, performance analysis and stable operations.

Startup Founder

GatherMatter: product logic, engineering, design, finance, sales, marketing and operations.

EXPERIENCE

June 2025 - present
Anton Paar

IT Application Specialist

- Work on IT and business applications with focus on interfaces, SAP-adjacent context and technical process improvement.
- Analysis and implementation of technical solutions in complex enterprise environments.

Feb. 2026 - present
GatherMatter

Startup Founder

- Solo founder of a production SaaS platform for event management, ticketing, booking and organizer workflows.
- Independently responsible for product logic, engineering, design, finance, sales, marketing and operations.
- Platform with ticketing, QR check-in, organizer workflows and first organizers as customers; currently five-figure platform volume.

Sep. 2023 - May
2025
Pankl Racing Systems

IT/ERP System Administrator

- Process owner for IAM in ERP/DMS context, including least-privilege access management.
- Linux RHEL and Windows system administration, monitoring, performance analysis and critical support.
- Software asset management, licensing optimization, SDLC security practices and incident/security analysis.

Sep. 2019 - Sep.
2023
Pankl Racing Systems

Apprenticeship Software Development

- Application development training with production practice in enterprise systems.
- Completed the application developer - coding final apprenticeship exam in September 2023.

SELECTED EVIDENCE

License optimization tool

Role: Independently handled idea, planning, concept, programming and documentation.

Impact: Rolled out to more than 1,000 PCs and saved six-figure license costs.

DMS migration and permissions

Role: Main responsibility for document splitting, upload, import, indexing, access concept and AD-based permissions.

Impact: More robust workflows and traceable access models for multiple business areas.

AI pilot project

Role: Designed and programmed the interface independently.

Impact: Early, practical AI usage in an enterprise context instead of an abstract demo.

EDUCATION & CONTEXT

Apprenticeship	Application Development - Coding at Pankl Racing Systems, 2019 - 2023
Final exam	Final apprenticeship exam Application Developer - Coding, passed on 2023-09-21
Vocational school	Landesberufsschule Eibiswald, final certificate 2022/23 with grade average 1.0
Technical profile	IT all-rounder with practical experience in software, infrastructure, security, automation, hardware and technical troubleshooting.
Own infrastructure	Operates own web/Linux infrastructure including domains, deployment, SSL and production services.
Hands-on	PC hardware, 3D modeling/printing, car repair/tuning, music production, DJing and videography/editing.
Born	6 August 1999 in Greifswald, Germany
Citizenship	Germany
Languages	German native, English fluent/C2.
